

Health

MaryAnn Rollings, Health Coordinator
508-799-3229

Our full time center nurses and part time dental hygienists work with families to ensure that there is an ongoing source of continuous accessible medical care. Health records are maintained on each enrolled child, which show an up-to-date schedule of age appropriate preventive and primary healthcare including all appropriate tests and physical examination. Nurses work with families to review their health insurance options and information and support is given to uninsured families with a goal to apply for appropriate coverage.

Within 90 days of a child's enrollment, health screenings are conducted and documentation is gathered in securing a medical home. Our nurses also offer health and safety education and information for each family to support family/child health and well being. All families are invited to attend our Health Services Advisory Committee, made up of health professionals and parents of enrolled Head Start children. The committee meets three times a year to advise in the planning, operation and evaluation of the health services discipline.

If you are interested in attending a Health Advisory Meeting, or would like more information on our health services please call MaryAnn Rollings, Health Coordinator at 508-799-3229
