

The mission of the Child Development Head Start Program is to provide a high-quality preschool program that prepares children to succeed in tomorrow's world.

The program enhances the self-esteem and personal growth of all children including those with special needs while preparing every child to enter school ready to learn.

Respectfully building on each family's strengths, goals and role as their child's first teacher, Head Start works in partnership with children, families and the community to promote and advocate for healthy development.
